

Web Designer / Web Developer

Objective

I enjoy designing websites, and I'm looking for a full-time position designing websites with a company of great people who are as excited as I am to be doing the best thing in the world for a living!

Professional Experience / Employment History

Town North Bank, Dallas, Texas

2008 to present

Title: *Web Designer/Developer*

Job Description: I maintain several public-facing websites: tnbonline.com, townnorthbank.com, tnbcad.com, gotomycard.com and apply.gotomycard.com. For each website, I establish publishing guidelines and standards for website organization, functionality and layout, and create new web pages, graphics and Flash or .gif animations as necessary. I make decisions on the technology used within the sites and maintain control over content appearance, subject to approval by the website owners.

On a weekly basis, I update investment rates for tnbonline.com. On a daily basis I complete work order requests as they come in and assist users with any website needs, create email forms complete with Javascript validation and create promotional ads as requested by either marketing department. Every day I also keep myself abreast of new web design methodology and best practices using several blog sites. I act as web consultant for both marketing departments.

Job Highlights:

- I implemented a website design for tnbonline.com that was created by a third party before I was hired. I created UI widgets for the main page and left navigation user controls that appear on subsequent web pages.
- I created and installed an improved navigation interface for tnbcad.com Client Center using css flyout menus that resulted in better information-finding capability for all clients.
- I worked with TNB developers to create a website with centrally-located client customization. Each client sees their logo or banner when they connect to the website, and all rate and disclosure info comes from a centralized source. This replaced an older website and saved hours of update work by the website administrator.

Skills Required: (Primary) HTML, CSS, Dreamweaver, Flash, web page design and layout, Photoshop, (secondary) Illustrator, Javascript, JQuery, classic ASP, ASP .Net using Visual Studio.

USA Mobility, Plano, Texas

1999 to 2008

Title: *Web Designer/Developer*

Job Description: Update internal and external websites, update/create graphics as needed, create Flash animations, create and validate forms for email submission. Provide support for older PERL applications.

Job Highlights:

- I maintained existing websites usamobility.com and https://myaccount.usamobility.com/ and intranet websites.
- I managed requests for changes to websites as the company consolidated web websites due to the company being acquired and merged.
- I updated navigation in usamobility.com for better cross-browser functionality and appearance.
- I created scripts that allowed users to display Flash animation or a static image (before swfobject), and turn

movie sound off or on.

- I created Flash movies to display sales force incentives and sales channel information.
- I developed a set of generic ASP email forms that could be used to create customized and validated forms in a very short amount of time.
- I contributed to the print and graphic design needs of the company.

Skills required: (Primary) HTML, Dreamweaver, web page design and layout, Photoshop, Javascript, (secondary) Illustrator, classic ASP, PERL.

Nortel Networks, Dallas, Texas

1983 to 1999

Title: *Field Service Technician*

Job Description: Maintain and repair proprietary super-mini computer systems and software that provided directory assistance services to Texas and the adjoining states for Southwestern Bell Telephone.

Skills required: Electronics knowledge, system troubleshooting, UNIX/AIX.

United States Air Force, Bellevue, Nebraska

1979 to 1983

Title: Computer Technician

Job Description: Provided mission support by maintaining national defense communications system computer system at SAC Headquarters. Honorably discharged.

Skills Required: Knowledge of D.C. circuits, high-reliability soldering, troubleshoot electronics to component level for multiple computer systems.

Volunteer Work

Coldwater Creek Neighborhood website

2010 - present

Recently designed a new website for my neighborhood, <http://www.coldwatercreekneighborhood.com> to help keep neighbors informed about neighborhood activities. Includes a WordPress blog that I modified to match the look and feel of the website.

James Bowie High School Marching Band, Arlington, Texas

2002 - 2010

Title: *Web Master*

Created and maintain website for Bowie High School marching band, <http://www.bowieband.com>. Maintain birthdays and student contact information, monitor and moderate guest book. Special features include custom birthday display script (PERL/CGI), custom script that uses frames to display marching band pictures (Javascript) and guest book. Took football half-time and contest photos for website display. Create mass HTML email announcements as necessary, obtained and implemented opt-in email software system that allows the email to be sent to incremental groups of email addresses over a given time period. Home page allows users to customize the greeting using a layer and a cookie.

James Bowie High School Football, Arlington, Texas

2006

Title: *Web Designer*

Designed new football website for the football booster club, <http://www.bhsvolsfootball.com>. Created new information flow and added special features such as vertical website navigation, football roster image and information display. The football booster club currently maintains this website.
