**KELLEY  
THOMPSON**

## OBJECTIVE

### WEB DESIGNER/FRONT-END DEVELOPER

Web design and front-end as it relates to design, plus light development. I am looking for a full-time remote position (hybrid, if Omaha area) with a company of great people and a fun team where I can contribute by using my skills to create and implement new ideas, solve day-to-day web site issues and be challenged to develop new skills.

## PROFESSIONAL EXPERIENCE

## SKILLS

### Primary:

HTML  
CSS  
Bootstrap  
Dreamweaver  
Photoshop  
Illustrator  
Javascript  
JQuery  
Angular  
Agile

Responsive design  
Web site design  
Web page layout

### Secondary:

PERL  
PHP  
Adobe Audition  
Adobe Premiere  
Adobe Encore  
Adobe After Effects

FIS from Worldpay (remote employee, Omaha, Nebraska)

*Web Designer*

2010 to Present

I provide web design services, graphics and light development for various internal and external clients on multiple web sites.

### *FIS sites:*

- ▶▶ Created a new Balance Transfer website using *Angular NX* (this required me to learn NX layout in order to match code with Target RedCard development) for hand-off to developers.
- ▶▶ Working with a few other developers, I designed module layouts using *Angular* for a new **Target RedCard** site that updated their existing code while retaining most of their look and feel.
- ▶▶ Created *new responsive layouts* for **QAS** (Quarterly Assessments System) and **ACF** (Advanced Clearing Funds) websites using *Bootstrap* for hand-off to developers.
- ▶▶ Remade CSCU logo to comply with legal team requests for trademark requirements.
- ▶▶ Modified initial developer layout for "**Buy Now, Pay Later**" website initiative for hand-off to developers.

### *Worldpay sites:*

- ▶▶ **vip.vantiv.com** -  
Client portal site. Designed and created new web pages, and updated client training materials.
- ▶▶ **www.gotomycard.com** -  
Created *responsive* CSS for credit union clients who requested customized site branding. This site was a tool used by our financial institution clients that gave their customers the ability to manage their credit card accounts. Redesigned entire site with new *HTML* and *Bootstrap*.
- ▶▶ **www.designitphotocard.com** -  
This site allows clients the ability to upload their own photos in order to customize their credit card plastic. I added header photos that were provided to me and designed all other elements in the site.

## PROFESSIONAL EXPERIENCE (continued)

**Skills Required:** HTML, CSS, Dreamweaver, Photoshop, Illustrator, Angular (using VS Code), Javascript, JQuery, Bootstrap v4/v5, web page design and layout.

Town North Bank, Dallas, Texas

Web Designer

2008 to 2010

►► **www.tnbonline.com** -

Implemented new third-party design, which included content regrouping and organization, optimized all graphics used in the site. After the web site was put into source control and updated to .Net, I learned how to use master pages for layout, and .Net controls for repeating navigation elements.

►► **www.townnorthbank.com** -

Updated navigation and other data as requested from the business and created a new *animated Flash banner* to replace an outdated one. The site's layout, created by a third party, was already decent, I added a few more features such as Google maps for location and updated the contact form with *Javascript* validation. This site was eventually consolidated with [www.tnbonline.com](http://www.tnbonline.com).

►► **www.tnbcad.com** -

Implemented marketing campaigns (graphics and layout) and created web forms with Javascript validation for email submission for this registered client portal. I updated the entire site with modern code; in a later change I updated the site navigation, adding drop-down sub-menus and fly-out elements, resulting in positive client reviews for ease of use.

I created graphics for the web and a few for print, also *Flash* and *GIF animations* plus *banner and tower ads* for both marketing departments to support various marketing campaigns as requested. On occasion I updated the layout of an email template used regularly to send client information. I also acted as "best practices" web consultant for both bank and card services marketing departments.

**Skills Required:** HTML, CSS, Dreamweaver, Flash, Photoshop, Illustrator, Javascript, JQuery, web page design and layout.

USA Mobility, Plano, Texas

Web Designer

2004 to 2008

►► **www.usamobility.com** -

Updated intranet and the primary web site, updated or created graphics as needed, created *Flash animations*, created and validated web forms for email submission. Provided support for older PERL applications.

**Skills required:** HTML, Dreamweaver, Photoshop, Flash, Javascript, Illustrator, classic ASP, PERL, web page design and layout.

## PROFESSIONAL EXPERIENCE (continued)

WebLink Wireless, Dallas, Texas

*Web Designer*

1999 to 2004

►► [www.weblinkwireless.com](http://www.weblinkwireless.com) -

The corporate website was created by an external firm. Our relatively new web design team took the website in-house for redesign and maintenance. We also maintained an intranet site with multiple department subsections.

**Skills required:** HTML, Dreamweaver, Photoshop, Javascript, web page design and layout.

United States Air Force, Bellevue, Nebraska

*Computer Technician*

►► Honorably discharged.
